SUMMARY

I am third grade student at Bahçeşehir University Software Engıneering. I learned Java, C++, SQL., Python

EDUCATION

BACHELOR'S DEGREE

Bahcesehir University   2022 - Present
Software Engineering
GPA: 3.64

High School DEGREE

Besiktas Anatolian High School   2018 - 2022
GPA: 91

PROJECTS

Minecraft Mod View
March 2023 - April 2024

I have developed a GUI application with Java where you can list and search some of the known Minecraft mods. Github Link

Shapot
Jul 2024 - Jul 2024

Our team of three participated in a Game Jam with over 2,400 entries. In just two weeks, we developed a 2D single-player dungeon crawler game using the Godot Engine and GD script, and we achieved a score of 3.25 out of 5. Game Link

Face Mask Detection
December 2024 - January 2025

I have trained a model with YOLO and SSD using python. It detects face masks and classifies them into three categories; worn correctly, incorrectly or not worn. I also built a demo to test the model on web cams. Github Link

CERTIFICATES

Requirements Specifications: Goals and Conflict Analysis

Requirements Elicitation: Artifact and Stakeholder Analysis

Requirements Gathering for Secure Software Development

PERSONAL DETAILS

Date of Birth
06/06/2004

Driver's License
B
